Members of the General Assembly
State of Missouri

Ladies and Gentlemen:

The State Board of Education herewith submits its One Hundred Forty-first Report of the Public Schools of the State of Missouri. This report, prepared in compliance with Section 161.092, Missouri Revised Statutes, covers the school year ending June 30, 1990.

We hope the information contained in this report will be of interest and assistance to you as you consider the needs and major problems of the public schools of the State of Missouri.

Respectfully,

Thomas R. Davis, President
Missouri State Board of Education

The State Board of Education was established in its present form by the Missouri Constitution of 1945. The State Board of Education consists of eight lay citizens appointed by the Governor with advice and consent of the Senate. Article IX, Section 2(a) also states that no more than four members of the Board may belong to the same political party. State Board members are appointed for eight-year terms which are arranged so that only one term expires each year. The Board elects its own officers.

The responsibilities of the State Board of Education extend from preschool through postsecondary and adult education programs. These responsibilities include:

- Establishment of policies for the leadership, service and regulation of public education. These policies are administered by the Missouri Department of Elementary and Secondary Education.
- Operation of the State School for the Blind and the State School for the Deaf.
- Operation of State Schools for Severely Handicapped Children.
- Classification of schools and certification of teachers.
- Administration of vocational education, vocational rehabilitation and veterans' education programs.
- Administration and supervision of programs under the Elementary and Secondary Education Act of 1965 and other federal programs.
- Apportionment of state moneys.
- Publication of laws relating to schools.
- Collection and publication of information which reflects continuously the condition and management of the state's public schools.

PART I

# Highlights of 1989-90

*State Board of Education calls for changes in Missouri's school-funding system.*

In December 1989, the State Board of Education formally recommended changes in the Foundation Program, Missouri's primary source of state funds for public schools. Based on nearly three years of study, the Board's proposals were submitted to the General Assembly for consideration during its 1990 session.

Although the General Assembly did not adopt the Board's plan for overhauling the Foundation Program, the Board's proposals sparked widespread discussion about financial problems affecting Missouri schools. Legislative debate over the proposed changes also brought new attention to the need for improving the Foundation Program.

"Equity. Flexibility. Simplicity. Those are the three major goals we want to achieve by revising the Foundation Program," said Commissioner of Education Robert E. Bartman in describing the plan developed by the State Board of Education.

"The current formula is out-of-date. It is not doing enough to close the gap between rich and poor school districts. We have a constitutional obligation to fix those problems," he added.

"Clearly, the current funding system is inequitable and is not responding to actual needs and conditions in school districts across the state," said Tom Davis, president of the State Board of Education, on December 14, 1989, following the Board's adoption of proposed changes in the Foundation Program. The Board had worked aggressively to complete its Foundation Program recommendations in time for the plan to be submitted to the General Assembly in 1990.

## State Board Officers Elected; New Member Appointed

**Thomas R. Davis,** a Sedalia businessman, served as president of the State Board of Education during 1989-90; **Rev. Raymond F. McCallister, Jr.,** Fulton, served as vice president. Both were elected to second terms in their respective offices for 1989-90. In October of 1989, **Gary M. Cunningham,** was appointed to the State Board of Education by Gov. John Ashcroft. An attorney from Ladue, Mr. Cunningham replaced Terry A. Bond of Clayton. In October 1989, Gov. Ashcroft also reappointed **Cynthia B. Thompson,** a St. Louis businesswoman, to a full term on the State Board. Mrs. Thompson was first appointed to the Board in 1986 to fill an unexpired term.

The Board's plan called for three major changes in the "minimum guarantee formula" portion of the Foundation Program:

1. In the existing formula, a factor known as the "prior-year amount" ties a school district's per-pupil allotment of state funding to the amount received during the preceding year. The Board called for eliminating this factor so the formula will accurately reflect changing conditions in local school districts.

2. The current formula requires more than a dozen complex calculations to determine each school district's funding. The Board's proposed formula involved only four calculations.

3. The existing formula measures a local school district's relative "wealth" in terms of assessed property values, personal income and tax rates. The Board's proposed formula included provisions to reflect other sources of revenue and provide a more accurate measure of local wealth.

During 1989-90, Missouri's 544 school districts received a total of about $1.1 billion through the Foundation Program. About $250 million of that amount was paid "off the top" as categorical aid to fund transportation and special education programs in school districts. The remainder—about $850 million—was allocated through the minimum guarantee formula.

The current Foundation Program was created by the General Assembly in 1977 and has received only slight modifications since that time.

## Officials Launch Campaign to Promote Parent Involvement

At the start of the 1989-90 school year, the Department of Elementary and Secondary Education, in cooperation with the Missouri PTA and Southwestern Bell Telephone, launched a special project designed to promote greater parental involvement in education throughout Missouri. Called "Success in School is Homemade," the campaign was an outgrowth of Commissioner Bartman's desire to increase parental involvement in children's learning.

The project was officially launched on September 14, 1989 during a series of news conferences across the state. Gov. John Ashcroft, Commissioner Bartman, PTA leaders, Southwestern Bell executives, and local school officials participated in the news conferences which were held in the Blue Springs, Pattonville, Columbia and Springfield school districts.

Since 1989, Southwestern Bell Telephone and the Southwestern Bell Foundation have donated more than $130,000 to the Department of Elementary and Secondary Education to underwrite the cost of the campaign and the development of materials based on the "Success in School is Homemade" theme.

Describing the purpose of the project, Commissioner Bartman said: "Even though everyone seems to agree that family involvement is essential, we still have too many 'missing parents'—

the ones who never come to parent-teacher conferences, for example, or those who seem to be apathetic about their children's schooling.

"Educational reform cannot succeed if students lack the motivation, attitudes, support, self-discipline and self-esteem that come from the home. Encouraging *all* parents to be full partners in the learning process needs to be a priority for educators."

The main goals of "Success in School is Homemade" are to increase public awareness of the importance of parent/family involvement in education and to encourage stronger home/school partnerships. One of the Department of Elementary and Secondary Education's main objectives in the project is to provide local school officials and parent leaders with practical ideas and materials they can use to promote increased family and parent involvement.

## Non-teachers Can Seek Certification

In October 1989, the State Board of Education formally approved an alternative certification process that enables non-teachers to qualify for state teaching credentials under certain conditions.

The alternative certification policy makes a teaching career possible for a person who has not completed a traditional teacher-education program. The policy also allows school districts to employ local experts, such as retired business and professional people, to work as "special assignment" teachers on a part-time basis for up to two years.

To be eligible for an alternative certificate, a person must have at least a bachelor's degree and at least five years of work experience related to the degree. Alternative certificates will be available only at the secondary level, except in the fields of art, music and foreign language.

Alternative certification candidates must enter into an agreement with a school district, a teacher-education institution and the Department of Elementary and Secondary Education. After completing eight to nine hours of basic professional courses or demonstrating competence in those areas, they would be eligible to begin teaching with a two-year provisional certificate. The provisional certificates are valid only in the districts where they are employed.

By taking additional college courses during their first year and meeting other requirements that apply to prospective teachers, including passing a subject-matter test, candidates would be able to earn a standard, renewable teaching certificate.

## Multi-state Certification Plan Approved

The State Board of Education also adopted a policy designed to make it easier for teachers from neighboring states to obtain initial certification and begin working in Missouri schools. The "exchange certificate" plan was formally endorsed by officials in Missouri, Kansas, Iowa and Nebraska.

Adopted in May 1990, the agreement allows a teacher who moves from Missouri, Kansas, Iowa or Nebraska to one of the other states to receive a two-year, non-renewable certificate and be eligible for employment. The special certificate will give a teacher two years to meet each state's unique licensing requirements.

"We hope this plan will benefit individual teachers who move to and from Missouri and also help school districts that recruit teachers from neighboring states," said Commissioner of Education Robert E. Bartman.

To be eligible for the exchange certificate in any of the four states, a teacher must have graduated from a state-approved teacher education institution. Applicants who apply for the exchange certificate must hold a valid license and not be involved in any disciplinary proceedings.

If the plan works smoothly, Bartman said, education officials hope the reciprocal agreement can be expanded to include more neighboring states.

**From Moscow to Mizzou.** Fifteen-year-old Michael Orlov brought the spirit of "glasnost" to the sixth annual Missouri Scholars Academy, held June 10-30, 1990, at the University of Missouri-Columbia. State education officials invited the Soviet student to attend the three-week program for gifted high school students because of an emphasis on international affairs and culture in the Academy's curriculum. His participation was made possible by the Gifted Association of Missouri and the Organization for American-Soviet Exchanges. In this photo, Michael "meets the press" at a news conference during the Academy. The souvenirs of his trip, he said, would be friendship and understanding between Soviet and American students.

## "PAT" Kids Still Ahead After Four Years

Missouri children who took part in the Parents as Teachers program during the early 1980s were significantly ahead of other children in academic performance four years later, at the end of first grade, according to a follow-up study released in March 1990 by the Department of Elementary and Secondary Education.

The study also showed that mothers and fathers who took part in the Parents as Teachers (PAT) pilot program have continued to play a more active role in their children's learning and formal schooling than other parents.

"These findings indicate that Parents as Teachers is producing the benefits we had expected—children who are more successful in school and parents who are more confident and more involved. This is good news for schools and for families taking part in PAT across Missouri," said Commissioner Bartman.

The PAT program, offered in all Missouri school districts, provides information and support for families with children from birth to age 3. The program has operated on a statewide basis since 1985 and served more than 100,000 families during 1989-90.

The follow-up study included families who took part in the Parents as Teachers pilot project from 1981 to 1985. Nearly 400 families in four Missouri school districts were involved in the pilot project. At age 3, children in the pilot program were significantly ahead of other youngsters in language, intellectual and social skills.

The positive results of the pilot project provided the impetus for a 1984 state law that made PAT services available in all public school districts.

The follow-up study was completed in 1989. It included families who took part in the evaluation of the PAT pilot project and whose children completed first grade in 1989. The study involved 118 children—69 from the pilot project and 49 from the original comparison group—who were enrolled in 71 public and private schools across Missouri. The study's major findings include:

- At the end of first grade, children from the PAT pilot project scored significantly higher than the comparison group on standardized reading and math tests.
- Teachers were asked to evaluate children's performance in seven areas—reading, math, language arts, spelling, personal/social development, work habits and physical education. In six areas, children from the initial PAT project were rated higher than the comparison group. In the area of spelling, the pilot-project children were rated significantly higher.
- Teachers reported that significantly more parents from the pilot project initiated requests for parent-teacher conferences after their children started school.
- Parents from the comparison group were twice as likely as those from the PAT project to report that they "never" took part in school activities such as attending parent meetings, assisting with field trips or helping in their children's classrooms.

The follow-up study was conducted by the Parents as Teachers National

## Schools Receive First "VIDEO" Grants

In 1988, the General Assembly established the Video Instructional Development and Educational Opportunity Program (VIDEO). It is intended to help all educational institutions in Missouri supplement regular instructional activities through the use of telecommunications technology such as satellite broadcasting and instructional television.

The program is funded with earmarked sales tax revenue from the rental of videocassettes throughout the state. The sales tax on videotape rentals went into effect January 1, 1989. Previously, such rentals had been exempt from sales tax.

During the 1989-90 school year, VIDEO grants totaling about $4.7 million were distributed to Missouri school districts, higher education institutions and public television stations. The VIDEO program provides funds for three purposes:

1. Grants to public school districts, public colleges and universities and public television stations for equipment.

2. Development of instructional programs which can be transmitted through the airwaves or by cable television.

3. Development of instructional programs to be made available on a subscription basis.

A total of 458 school districts, 21 higher education institutions and five public TV stations received VIDEO funds during the program's first year of operation. The bulk of the funding was used by schools and colleges to acquire telecommunications equipment—satellite receivers, televisions, videocassette recorders, computers, cable television service, dedicated telephone lines, and Instructional Television Fixed Service (ITFS) antennae.

The expanded use of telecommunications and satellite-broadcast programming will allow school districts to provide enhanced services such as: enrichment programs for students via cable or satellite TV; academic courses, for credit, that are broadcast via satellite from remote locations; and teleconferences which allow school board members, teachers and other personnel to participate in a wide variety of interactive inservice training programs via satellite.

The VIDEO program is administered by the Department of Elementary and Secondary Education and a 27-member state advisory committee required by the law. Funding for the VIDEO program will expire after five years unless the General Assembly takes action to reauthorize the program.

Center, located in St. Louis, and Research and Training Associates, an independent research firm in Overland Park, Kansas. The study was funded by a Ford Foundation grant.

## New Policy Limits "Channel One" Use

In December 1989, the State Board of Education approved a policy designed to restrict local school districts' use of commercial television programs such as "Channel One."

Channel One, produced by Whittle Communications of Knoxville, Tenn., is a daily news and current-events program geared to secondary-level students. The program became available to schools nationwide during 1989-90. Broadcast by satellite, the 12-minute program includes two minutes of commercials. Schools that agree to show the program to students daily receive satellite receivers, TV monitors and other equipment.

Under the policy approved by the Board, Missouri districts are free to sign contracts with Whittle Communications. However, districts generally will not be able to count the time that students spend watching the program, or similar broadcasts, as part of the regular instructional day. Students also may not use the program to meet high school graduation requirements. These restrictions may not apply if a district can show the program meets specific class objectives or supports the regular curriculum.

**Master Motivator.** Molly Hankins was Missouri's Teacher of the Year for 1989-90. She teaches social studies and gifted-education classes at Palmer Junior High School, Independence School District. Known for her enthusiasm and ability to motivate students, Hankins has spent all of her 16-year career in the Independence district.

## New Commission for the Deaf Holds First Meeting

The Missouri Commission for the Deaf, created by the State Legislature in 1988, met for the first time on September 20, 1989, at the Missouri School for the Deaf, Fulton.

The nine-member commission will function as a state-level advocacy group for deaf and hearing-impaired Missourians. The commission's duties include developing state certification for interpreters of the deaf, conducting a census of the state's deaf population, promoting expansion and coordination of services for the deaf and building public awareness of deaf citizens' needs.

Although established as part of the Department of Elementary and Secondary Education, the commission will function largely as an independent board with its own executive director. The commission's office is located at the Missouri School for the Deaf.

## Elementary Schools Honored

Five elementary schools in Missouri received top honors in the 1990 Elementary School Recognition Program, sponsored by the U.S. Department of Education. The five were among 221 public and private schools across the country to be honored.

The Missouri schools receiving national honors were:

Barretts Elementary, Parkway School District; E.F. Swinney Elementary, Kansas City School District; New Franklin Elementary, New Franklin School District; Ralph M. Captain Elementary, Clayton School District; and Robinwood Elementary, Ferguson-Florissant School District.

The School Recognition Program was established in 1983 by the U.S. Department of Education.

# A Decade of Results

*by Robert E. Bartman*

During the eighties, educators have made a Herculean effort to respond to the national cry for school reform. In Missouri, this effort has paid off in many tangible ways. As a result of the Excellence in Education Act of 1985, for example, Missouri has implemented programs such as the career ladder, minimum salaries and statewide criterion-referenced testing.

In addition, Missouri has gained widespread acclaim for expanding early childhood and parent education. We have eliminated lifetime certification for teachers and implemented a comprehensive system of performance-based evaluation for teachers and administrators. In 1982, Missouri voters approved Proposition C, the one-cent sales tax that has provided much-needed financial support for local schools.

During this decade, basic state funding provided for public schools through the Foundation Program has increased 80 percent, to a current level of $1.1 billion. State and local spending for school operations has doubled during the 1980s to $2.8 billion. The average teacher's salary has doubled to about $26,000. State funding for programs for gifted students has increased almost by a factor of 10.

We have reduced the student-teacher ratio from 23-to-1 to 21-to-1 on a statewide basis during this decade. While the number of students in our public schools has dropped by 66,000 since 1980, the number of classroom teachers has grown by about 2,000.

The scope and the pace of change over the past decade probably would have seemed impossible to us in 1979. For many Missouri educators, it has been an exhausting, sometimes frustrating, period. There is no question, however, that our school system is substantially different today, and in many ways better, than it was just 10 years ago.

**An Obsession with Results**

A recent survey of America's largest corporations, sponsored by *Fortune* magazine and Allstate Insurance, showed that 87 percent of business leaders are concerned about problems in public education. Almost two-thirds of the executives included in this survey also said the quality of education *deteriorated* during the 1980s. Many of these same leaders are now calling for massive "restructuring" in our schools in order to improve our academic performance and competitiveness.

*I believe we should gradually extend the school year to at least 200 days.*

If you look only at the bottom line, it is not difficult to understand why corporate leaders have negative perceptions about our educational system. Despite the improvements we have made in many areas, performance indicators for our schools have remained virtually static. In 1980, for example, Missouri's persistence-to-graduation rate for high school students was 73.7 percent. Today, it is only 75.5 percent. In other words, we are still losing one of every four students who enter high school. In 1980, Missouri's average score on the American College Test was 18.9. Our latest score is 19.

There is little point in arguing about the numbers. No, it doesn't matter that the cost of cars, houses and everything else has increased sharply during the 1980s. The issue today is perception. And many Americans now believe they are spending more for education and getting less.

The 1980s have been a decade of reform. The 1990s must be a decade of results. To counter negative attitudes about education and gain renewed public support, schools must "stand and deliver." We, as educators, must develop an obsession for results. We must reduce the dropout rate. We must improve student performance in math and science. We must develop new alliances with parents, business people and community leaders as we seek to intensify the formal school curriculum and diminish the power of the curriculum of the streets.

I believe that one key to improving schools' productivity during the 1990s will be to increase the time available for learning. If improving education in our state and nation is a genuine priority, then we should be willing to spend more time at it.

Personally, I believe we should gradually extend the school year to at least 200 days. In addition, I think schools should try to offer a "fifth quarter" of summer classes. I hope summer school can eventually be seen as a reward or an enhancement, not just as a penalty for students who are having difficulty.

As we seek to make the 1990s a decade of results, I think educators should champion the concept of extending the time available for organized teaching and learning. □

This article, by Commissioner of Education Robert E. Bartman, appeared in the September/October 1989 edition of *Missouri Schools* magazine.

# Summary of Legislation

*New laws focus on early childhood special education, programs for at-risk youth and earthquake preparedness.*

Following is a recap of the major education-related legislation enacted by the 85th General Assembly during its second regular session in 1990.

**Services for Preschoolers with Disabilities**

The most far-reaching legislation enacted by the Missouri Legislature in 1990 will extend special education services to 3- and 4-year-old children with disabilities. Under this law, the new special education programs will begin with the 1991-92 school year. This legislation represents the biggest expansion of special education services in Missouri public schools since the early 1970s.

The law requiring early childhood special education services responds to a 1986 federal mandate which requires states to provide comprehensive services to 3- and 4-year-olds. States that do not meet this requirement risk losing certain federal funds for special education.

At the time the measure was enacted, the Department of Elementary and Secondary Education estimated that 7,500 preschool-age children would be eligible for special education services beginning in 1991. During the 1989-90 school year, 100 school districts across the state were providing special services to about 1,500 3- and 4-year-olds on a voluntary basis. *(Sections 162.700 and 162.975, RSMo.)*

**Children at Risk in Education Fund**

The General Assembly adopted an ambitious omnibus bill designed to meet the diverse needs of at-risk children and youth. Although the Legislature did not authorize any funds for this effort during 1990, it established the "Children at Risk in Education Fund" to support six initiatives in the future:

- A half-day preschool for 3- and 4-year-olds who have developmental delays or who are from disadvantaged families.
- Teacher assistants in grades K-3. The state would provide $3,000 salary supplements to encourage school districts to hire assistants in the primary grades. School districts are required to offer a breakfast program in order to qualify for this support.
- Guidance counselors to work with at-risk students in grades K-9. The state would provide $10,000 salary supplements as an incentive for school districts to hire extra counselors.
- Teachers for special high school classes designed to keep potential dropouts, including pregnant teens and teen mothers, in school. School districts would receive a state subsidy of about $8,000 for each such class.
- Grants to school districts and other organizations to provide special classes, tutoring, counseling, home visits and other support services for potential dropouts in public and non-public schools.
- Grants to professional development committees in local school districts to assist them in providing inservice programs about at-risk students. *(Section 166.260, et. al., RSMo.)*

**Mandatory Dropout Reporting Program**

Under another measure approved by the General Assembly, all public and non-public high schools in the state are required to report the names of known dropouts to the state "Literacy Hotline," operated by the Department of Elementary and Secondary Education. This requirement will take effect January 1, 1991. The dropout-reporting requirement is intended to help education officials refer former students to an Adult Basic Education program so they will be encouraged to continue their education or seek a high school equivalency certificate. *(Section 167.275, RSMo.)*

**Earthquake Preparations**

The General Assembly also took action designed to increase schools' readiness for a major earthquake. The law affects all school districts in 47 counties along the New Madrid fault. Effective January 1, 1991, this law requires new schools to meet seismic design standards; each school building must prepare emergency plans and hold earthquake drills twice a year; and school districts must inform students about earthquakes and safety measures. *(Sections 160.451 to 160.457, RSMo.)*

## TABLE 37
## SUMMARY OF COURSES OFFERED IN SUBJECT MATTER FIELDS

**Number of Course Titles:** There is a listing of course titles for each major area published each year (see Table 36). This number is the aggregate of that listing by area.

**Duplicated Count of Students:** If a student is enrolled in more than one course in a major area, the student will be counted for each course.

**Percent of 9-12 Students Enrolled:** This is a ratio of students enrolled in the major areas divided by fall state enrollment for 9-12 grades. The comparison of years shows activities of areas.

## C. MISSOURI SCHOOL TRUST FUNDS

Section 162.790 (5) RSMo., authorizes the State Board of Education to accept grants, gifts, donations, or bequests for the use of the Missouri Schools for the Blind, for the Deaf, and for the Handicapped Children to deposit same in the Schools' Trust Fund in the State Treasury, or to invest such funds in stocks, bonds, deeds of trust, or any other investment securities in the amounts and in the proportions that the State Board of Education prudently selects.

The act further provides that "moneys in the School for the Blind Trust Fund or in the School for the Deaf Trust Fund or the School for the Handicapped Children Trust Fund shall not be appropriated for the support of the schools in lieu of general state revenues but shall be appropriated only for the purpose of carrying out the object for which the grant, gift, donation, devise or bequest was made," as recommended by the State Board of Education.

## EARLY CHILDHOOD EDUCATION

The 1984 Early Childhood Development Act (ECDA) authorizes local school districts to provide annual screening and parent education to families with preschool-aged children. Offered voluntarily and gratuitously to parents, these services are designed to detect and minimize problems that can interfere with children's growth and development and to support parents in their "teaching" role. State appropriations have grown from **$2,873,685** in 1985-86 to more than **$11,000,000** for 1989-90.

Parent education services are available on an ongoing basis from the third trimester of pregnancy to kindergarten entry. Grouped by developmental stages of their children, parents gather regularly to share parenting experiences and to receive developmental information. Periodic home visits are delivered by parent educators with varying backgrounds; all are required to successfully complete program training. Drop-in play groups, toy and book lending libraries, "warm" lines, newsletters, and information and referral networks are services that meet the varying needs of families.
